as Charles Klein in utilizing "The Ne'er Do Well" for the present impo erished stage ught to lack the usual elements of risk that are a part of every theatric I enterprise.
The resu t - f their collaboration was to be witness d last night at the Lyric Theatre. Then and there the Authors Producing ompany gave to the world the joint prodof these two writers well known in their varied fields.

It was not possible to avoid the impression that Mr. Klein's skill as a drmatist had been in a degree hampered is the us of a book as his inspiration. His style was more than once suggestive of the novelist rather than the playwright. Just how fatal any such method of telling a story may be to drama of any kind, and most of all to melo-

drama, need not be repeated here.
It is equally certain that Mr. Beach's popular hero in his new incarnation will not increase the large number of his friends His realization on the stage does not add virtues to the character, which in the author's hands is made a much more sympathetic figure

Three scenes in the first act of "The Ne'er Do Well put the circumstances of the hero befor, the audience. The first episode shows the young man after a successful football game with his comrades in a low He is drugged and put on a ship

The wastrel has awakened from the effects of the drug and liquor. He thinks he is in a hotel. The feeling of this scene is broadly comic. Every indication points such to a progress of the play.

This youthful dipsomaniac is not in the least heroic nor does he happen to be represented by an actor capable o suggesting the youth which could alone excuse such morals. When in the final scene of the first

morals. When in the final scene of the first act a woman pays the bills for the refreshments he has enjoyed on the voyage the youth is less romantic than ever. But as the play seemed up to this point to be pitched altogether in the key of faree nobody in the audience last night was disturbed by the conduct of the hero. He was, as represented by Hale Hamilton, amusing and persuasive. Nothing else seemed necessary.

The second act finds this hero in the American Consulate at Panama. He is still penniless, running up bills at the club gambling and losing and borrowing money from the Consulate and borrowing money from the Consul or anybody else who will give it to him and awaiting from his father, the remittances which will enable him to pay up and return home. Two telegrams do arrive finally from New York. One tells the Consulate that the American millionaire has no son—which is his father's way of intimating that he has disowned him and the other advises him to keep away from New York as the police are searching for him.

for him.

The wife of the American diplomat who had recognized him on the steamer, assures the Consul that the young man is the soly of a noted American business leader Finally she persuades the near do well to

Finally she persuades the ne'er do well to go to work.

He struggles against the suggestion. But he is persuaded—he is penniless and in a strange land—to take a job. With a sublime outburst of heroism he consents to go to work for the first time in his life.

Then it becomes evident that there is to be a serious side to the play about this stout, thirsty and good natured hero. The wife of the American diplomat in Panama is in love with the ne'er do well. He also seems to be in love with her. Certainly the husband is jealous. When he drinks two glasses of absinthe at the beginning of the third act and insists that the hero, now a conductor on a railroad, shall dine with the other important guests his jealousy has evidently begun to get the better of his

discretion.
The guests arrive, the host puts the hero

discretion.

The guests arrive, the host puts the hero at his wife's right at table and from the other end glares at the two. He drinks more chambagne and then rises formally to present his wife to the hero in the presence of their guests. She is already his—so says the husband—and he wants to give her to him formally.

Confusion. Hurried departure of guests dragging out the indignant hero. Wife weepingly reproaches husband. In remorse he staggers out of the room. Sound of pistol shot is heard.

The last act, which should be swifter and shorter than it is, shows the exterior of the court house in which the ne'er do well is being tried for the murder of the American diplomat! His father has come from New York and rails bitterly in the public square against the Government which refuses to release his son at his bidding.

As his own act in disowning the young man is responsible for his predicament at that minute it is difficult to find this captain of industry exther reasonable or sympathetic. The hero is released and departs for home with his father chaperoning the widow of the American diplomat, who in the plastic person of Katherine Kaelred has moved sinuously through the piay.

"The Ne'er Do Well" was scarcely more impressive in the author's serious moments than at other times. Unluckily the spirit of comedy was established by two whole acts. Then it was rather broad comedy. The millieu, too, suggested operetta.

Possibly this Southern atmosphere is better suited to the uses which were made of it in "The Dictator" and the other farces in which the hero is taken for somebody

better suited to the uses which were made of it in "The Dictator" and the other farces in which the hero is taken for somebody else. There was but a slight indication of this mistaken identity in the play seen last night. Having once put his hero before the audience in the light of an amusing cuss who got as much out of life as he possibly could without questioning the means it took, something more than a belated resolution to work was needed to glorify him as a martyr.

iution to work was needed to glorify him as a martyr.

Mr. Hamilton gave their full value to the comic episodes of the play even if it does not lie within his power to be romantic. In scenes of such strenuous melodrama as the play later contains it is more important for a hero to be romantic than amusing. We hope it is not true that nobody loves a fat man. But one should be reconciled to abandon the romantic with the accession of a certain weight.

Some of Mr. Klein's humor made its impression, although it was rather a striking pression, although it was rather a striking

of a certain weight.

Some of Mr. Klein's humor made its impression, although it was rather a striking recurrence of his old methods to hear the Consul in the second act roaring out his polysyllables just as De Wolf Hopper used to do when he called the grand vizier in his comic opera, a "bible backed, round shouldered, &c., son of a sea cook." Mr. Klein made his Consul roar at the hero in just this way.

There was humor in the character of the precocious daughter of the Consul, acted by Beatrice Noyes, and Mr. Harlan sputtered like a damp firecracker as the Panama officer and did succeed in imparting distinction to the character. Orlando Daly found the jealous husband a hard task. Robert Fischer as the rough Consul and De Witt Jennings were other capable actors and appeared in more or less pictureque scenes.

There was an interesting view of the

scenes.

There was an interesting view of the Gatun Dam from the windows of the consulate and a tropical tone to the square in Colon. The ship was a more or less substantial craft, although it was curious that in these days of stage mechanics there was in these days of stage mechanics. no attempt to suggest motion
